Historical Report

In connection with the report of the activities of CIA which is being compiled by the Historical Section, certain statistical questions have been submitted to each of the principal offices. It has been thought in most instances that they would prefer to prepare their own report rather than have a representative of this Section endeavor to obtain the information.

Attached is a summary of information desired. This is by no means complete, as it might occur to somebody on the inside that certain important points have been omitted. The Historical Section will be most grateful for your assistance in supplying the necessary answers. Perhaps you would be willing to designate an individual in your office who would act as liaison.
